SURGICAL INSTRUMENTS

Rizco Surgical Instruments for dental surgeons

A craftsman is known by WIs tools. Today's dental surgeons are master craftsmen in their field and require precision instruments of the highest quality to perform the delicate procedures that bring **Rizco Instruments** to thousands of faces around the world.

Smile Devotion Dental Instruments are developed to unique specifications with added features that are matched to the needs of market sectors in over 52 countries. Over 12,000 instruments, each of the finest quality, cover the entire range of general and specialized dental surgery.

With the knowledge born of 32 years of experience in the field, we are in a position to provide customized solutions, offer advice and guide you in instrument planning. We are happy to answer any query and as an innovative and reliable partner, help you solve any individual problem.

TWIs 'Product Catalogue' provides you with technical data and information on how to order from our wide range of instruments that include Extracting Forceps, Root Elevators, Scalers, Curettes, Explorers, Excavators, Pliers, Tweezers, Impression Trays, Plastic Filling instruments and other general surgery instruments.

Please feel free to ask for any other information, other product catalogues, or any dental product not featured in this catalogue.

Care for Dental Instruments

“The cost of maintenance is lesser than the cost of new instruments.”

The Quality, To Begin With

Rizco Surgical instruments passes through a system of strict quality control after each manufacturing step, guaranteeing the WIghest quality only. The quality control is both the inherent one and the one complying with international standards.

The Steel, To Be Sure

We procure our own special steel with a WIgher percentage of carbon and chromium. Instruments fabricated out of tWIs steel guarantee a longer life and durable functionality, ensuring satisfaction to users.

Experienced Craftsmen, To Create Master Pieces

All instruments are crafted by hand. Be it forging, macWIning, grinding and sharpening, all these processes are performed by our trained and experienced craftsmen. During manufacturing, every single instrument passes through numerous steps and every step is followed by an inspection process. We do understand what depends on the WIgh quality of our instruments and to tWIs end we allocate our best resources.

Intended And Specified Use, The Long Life

Always use the instrument for the function it has been designed for. Dental instruments are ultra fine precision instruments. A misuse can result in severe damage to the working points. Increase the life of instrument by its proper and correct use only. A

pair of scissors is meant for cutting soft tissues only. It should not be used to lift bones or for exploring and scrapping purpose.

Disinfection, Cleaning And Sterilization

Always clean the instruments before sterilization. If the instruments are sterilized without cleaning, the stains on them can be burnt into the instruments leaving permanent marks. TWIs is because of very WIgh temperature during sterilization.

Before cleaning, instruments should be disinfected using a suitable disinfectant preferably the one not containing Phenol.

Manual cleaning should begin soon after the surgeries are over. Do not delay cleaning. Use a soft brush and not a steel wool or drill brush to clean the instruments to remove stubborn impurities. Instruments should always be cleaned in a non-corrosive, natural cleaning agent with little foaming. The instruments should then be rinsed in distilled water.

The use of ultrasonic cleaners and thermo-disinfectant is also becoming common. Here again, care must be taken in the selection of cleaning agents, detergents and disinfectants. Please ensure that they do not damage the metal. Always remember

these methods can clean but do not sterilize!

RIZCO
SURGICAL INSTRUMENTS

Some Important Care Tips:

- Before sterilization, always inspect your equipment for any dirt remains or any organic or mineral deposits. The extreme heat can cause these deposits to be permanently burnt into the instrument, increasing chances of corrosion.
- Never mix stainless steel with other metals like aluminum, brass or copper. TWIs can cause electrochemical changes and also produce etcWIng or staining.
- Use distilled or demineralized water only.
- Always follow the manufacturer's instructions precisely when it comes to the temperatures and times involved for autoclaving, dry heating or germicidal solvents.
- Dry each instrument separately and completely. In case of remaining moisture, dry using a sterile cloth.
- Always use physiological oil and other suitable lubricants to keep instruments well oiled. TWIs is especially required for instruments comprising many parts like scissors, pliers and gouges. A regular use of oil prevents stiffness and corrosion and results in smooth functioning.
- WInged instruments like forceps and needle holders should always be opened for cleaning and sterilization.
- EtcWIng or engraving instruments for personal identification can damage the instrument itself and cause damage to other instruments as well. Damage to the polished surface can always lead to corrosion.
- Although stainless steel has outstanding corrosion resistant properties, contact with certain chemicals must be avoided.

Email: info@rizcosurgicalinstruments.com WhatsApp +92-310 0112030

Wire Bending Pliers

Jarabak
RSI12-4413
12.5 cm/ 5”
Excellent for precise bending of light wires. Precision grooves assure accurate bending and closing loops. Wires up to .020".

Reynolds
RSI12-4512
12 cm/ 4¾”

Light Wire Plier
RSI12-4513
12.5 cm/ 5”
The beaks are more tapered and longer than Angle Plier. Excellent for bending small diameter loops. Used for wires up to .016" (0.41 mm)

Wire Arch Bending & Forming Pliers

Tweed
RSI12-4611 T/C
11.5 cm/ 4½”
Rectangular Arch Pliers, Tweed Style Forming plier for square or rectangular wires. The blades are designed to be parallel at .020" (0.51 mm) opening. The working edges are carefully diamond-honed to prevent wire scoring.

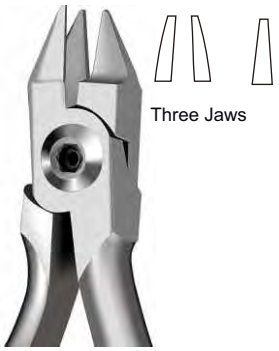

Tweed(Angle)
RSI12-4612 T/C
12 cm/ 4¾”

Loop Forming /Bending Pliers

Mckellops Plier
RSI12-5313
12.5 cm/ 5¼"
For wires up to .059" (1.5 mm).

Tweed Loop Forming

Tweed
RSI12-5413
12.5 cm/ 5¼"
Loop Forming, Tweed Style Pliers Designed for making loops in round or rectangular wires up to 0.022x.0.28" (0.56 x 0.71 mm). The cylindrical beak has three sections: 0.045" (1.14mm), .060" (1.52mm), .075" (1.90mm). Each section is 0.090" in length. The concave beak has slight parallel serrations which orient and keep the wire at a right angle to the beaks while the loop is being formed.

Omega Loop Forming

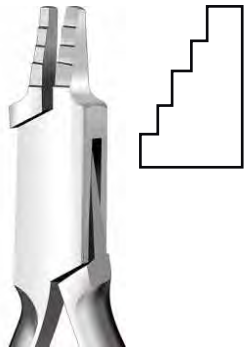

Tweed
RSI12-5513
12.5 cm/ 5¼"
Omega Loop Forming Pliers, Tweed Style
It just differs from the Model 12-5413 in the concave beak which is rounded for making more uniform omega loops.

Single Diameter Loop Forming

Tweed
RSI12-5613
12.5 cm/ 5¼"

RSI12-6612
Loop Closing Plier, Nance Style
Box joint with 4 sectioned tip for forming various size loops in rectangular and round wires.
For wires up to .028" (0.71 mm).

Wire Cutting Pliers

RSI12-5713 T/C
12.5 cm/ 5”
Hard Wire Cutter, Flat Back
Cutting capacity up to .020 round,
Arch wire up to .022 x .028 and all
sizes of ligature wire and pins.

RSI12-5813 T/C
12.5 cm/ 5”

RSI12-5913 T/C
13 cm/ 5½”

RSI12-6012 T/C
12 cm/ 5”

RSI12-6112 T/C
11.5 cm/ 4½”

RSI12-6212 T/C
12 cm/ 5”
Mini cut & hold distal end cutter
cuts with in 0.5mm from end of
buccal tube. Use on wire up to
0.22” x 0.28” rectangular and
0.20” round.

RSI12-6312 T/C
11.5 cm/ 4½”
Distal End Cutter with safety hold
It shear cuts hard wire and braided
wire and then, safely holds the loose
distal ends of the wire. thus preventing
from falling down into the oral tissues.
The cutting edges are diamond honed.
Maximum cutting capacity: rectangular
and twist wires up to .022 x .028"
(0.56 x 0.71); round wire up to .020"
(0.51 mm) in diameter.
